

# Paediatric Physiotherapy

Our experienced and qualified staff specialize in treating children from 0-18 years of age.

## Paediatric Physiotherapy Benefits

Children experiencing any of the following symptoms or conditions can benefit from physiotherapy:

- Developmental delay
- Acquired brain injury
- Cerebral Palsy and other neurological conditions
- Hypotonia / Hypertonia
- Torticollis
- Motor delays related to sensory disorders
- Gross motor delays
- Developmental Co-ordination Disorder
- Acute chest conditions / Cystic fibrosis
- Breastfeeding and oral motor feeding difficulties

Ottawa Valley  
PHYSIOTHERAPY  
& SPORTS MEDICINE

Visit [www.ovphysio.com](http://www.ovphysio.com)

## Assessment Services

During the assessment, outcome measures are used to assess strength, flexibility, gross and fine motor coordination, and functional abilities. Goals and outcomes are then discussed with you to determine treatment plans.

## Therapy Services

- Family centered approach to determine therapy goals and treatment plans
- Hands-on treatment with interactive games and toys are used to improve engagement
- Various treatments including Craniosacral Therapy, Neuro-Developmental Treatment and Myofascial Release
- Treatment may focus on maintaining range of motion, promoting mobility and postural control, gait training, strength, flexibility and balance
- Wheelchair / mobility aid prescription through the Assistive Devices Program (ADP) is available
